Chapter 4: *i*LEAP Social Studies, Grade 7

This section describes the overall design of the *i*LEAP Social Studies test to be administered to students in grade 7. Test specifications and sample test questions are provided so that teachers may align classroom practices with the state assessment.

Test Structure

The Social Studies test consists of one part and is administered in a single day.

The Social Studies test is a criterion-referenced test (CRT) that includes items based entirely on Louisiana’s Social Studies content standards. These items are aligned with Louisiana’s Grade-Level Expectations (GLEs) and were developed specifically for Louisiana.

Item Types

The test has forty (40) multiple-choice items.

The multiple-choice items consist of an interrogatory stem and four answer options. These items assess knowledge, conceptual understanding, and application of skills presented in the GLEs. Items will be intermingled across strands, not arranged into separate sections by strand.

To maximize the meaningfulness of multiple-choice items, questions are typically cast in a practical problem-solving context, referring to a single stimulus (e.g., a map) or to a description of a single scenario. The reading difficulty level of test questions is minimized to the extent possible (except for necessary terms) so that students’ reading ability does not interfere with their ability to demonstrate their social studies knowledge and skills.

Description of the Social Studies Test

The Social Studies test was developed specifically for Louisiana. Committees of Louisiana educators reviewed all items for content and alignment with Louisiana’s standards. Separate committees reviewed the items for potential bias and sensitive material.

The Social Studies test is **untimed**. About one hour (60 minutes) is the suggested time to allow students to answer the questions.

The grade 7 test assesses three of the four social studies strands delineated in the Louisiana Comprehensive Curriculum (LCC) and the Louisiana Social Studies Framework: History, Geography, and Civics.

History

The GLEs for grade 7 focus on a comprehensive study of American history from the causes and course of the American Revolutionary War to the Civil War and Reconstruction. Students learn about the creation and ratification of the U.S. Constitution, the creation of early foreign policy, the westward expansion of the United States, the effect of advancements in agriculture and transportation on the American economy, major reform movements, differences between northern and southern states that led to the outbreak of the Civil War, the course and consequences of the Civil War, and the successes and failures of Reconstruction. Students continue to employ historical thinking skills in understanding and analyzing American history.

Geography

The study of American history is integrally linked with the secondary focus of geography. The GLEs for grade 7 focus on the use of geographic information, tools, and concepts in learning about human settlement and migration, cultural diffusion, the effect of the physical environment on human settlement patterns and economic activities, and the consequences of urban development in the United States.

Students also are expected to apply the economic concept of interdependence and trade throughout their study of geography and history.

Civics

The GLEs for grade 7 focus on a thorough study of the early origins of the government of the United States, including its structure and major purposes. Students learn about the federal system, various forms of government, powers of the three branches of the federal government, qualifications and terms of major government leaders, how a bill becomes a law, problems faced after the American Revolution that led to the writing of the Constitution, major principles embodied in the U.S. Constitution and the Bill of Rights, the role of political parties in the American political system, and how foreign policy is formed and carried out. In addition, students will identify the requirements for U.S. citizenship, and explain the importance of the rights and responsibilities of citizenship.

Description of Stimulus Material:

The test will incorporate **at least one of each** of the following types of stimulus material:

- A map or illustration of a globe showing political divisions (e.g., states, countries), geographical features (e.g., topography, bodies of water), or variations in climate, vegetation, population density, etc.
- A table or graph presenting numerical data to be read or interpreted (e.g., a pictograph or a pie or bar graph showing the breakdown of natural resources in a region or a line graph showing rates of change over time)

- A timeline, chart, illustration, or graphic organizer (e.g., a web showing the relationship between the three major branches of government, a diagram showing the structure of the federal system, or a timeline outlining the major accomplishments of a president)
- An excerpt or article from a newspaper or magazine or a similar piece written expressly for the test
- An excerpt from such primary sources as historical documents (e.g., the Magna Carta, the U.S. Constitution, the Declaration of Independence), quotes and speeches, writings, journals, and autobiographies of major historical figures
- An excerpt from such secondary sources as reference books, literature, encyclopedias, artifacts, and nonfiction books on cultural, geographical, historical, political, or economic themes

Scoring Information

The *iLEAP* Social Studies test contains multiple-choice items only. These items have four response options (A, B, C, D) and are scored right or wrong. Correct answers receive a score of 1; incorrect answers receive a score of 0.

Strands, Benchmarks, and GLEs Assessed

Louisiana’s Social Studies content standards encompass four strands: Geography, Civics, Economics, and History. At grade 7, three strands are taught and assessed: Geography, Civics, and History. Each benchmark within a standard delineates what students should know and be able to do at the end of a grade cluster.

Strand G: Geography—Physical and Cultural Systems

Standard: Students develop a spatial understanding of Earth’s surface and the processes that shape it, the connections between people and places, and the relationship between man and his environment.

Strand C: Civics—Citizenship and Government

Standard: Students develop an understanding of the structure and purposes of government, the foundations of the American democratic system, and the role of the United States in the world while learning about the rights and responsibilities of citizenship.

Strand H: History—Time, Continuity, and Change

Standard: Students develop a sense of historical time and historical perspective as they study the history of their community, state, nation, and world.

The GLEs for social studies further define the knowledge and skills students are expected to master by the end of each grade level or high school course. The GLEs for each grade are developmentally appropriate and increase in complexity to build the knowledge and skills that students need. For example, the prekindergarten GLE “demonstrate an awareness of time” begins the development of the concept “interpret a timeline to identify cause-and-effect relationships among events in U.S. history.” In subsequent grades, GLEs build on this historical thinking skills concept.

Most of the grade 7 GLEs are eligible for assessment on the *iLEAP* Social Studies test. Some, however, do not lend themselves to testing on a statewide assessment. For the Geography strand, GLE number 4 is not measured on the grade 7 *iLEAP*. For the Civics and Economics strands, GLE numbers 17, 20, 21, 26, 28, 31, 41, and 42 are not directly measured by questions in the grade 7 *iLEAP*. In addition, GLE numbers 43, 44, 45, 46, 47, 48, 49, 50, 57, 59, and 63 focus on historical thinking skills that require students to use outside resources unavailable during the test or require students to provide an explanation; therefore they cannot be assessed in a multiple-choice format. Finally, in accordance with the Comprehensive Curriculum, GLE numbers 74, 75, 76, 77, 78, 79, 80, 81, and 82 may not be taught prior to the spring test administration and therefore will not be assessed. It is important, however, that the skills represented by these GLEs are taught at this grade level to prepare students for classroom assessment purposes as well as the grade 8 LEAP test.

Explanation of Codes:

GLEs are numbered consecutively in each grade level and grouped by strand and thematic category. For example:

<u>Strand:</u>	Geography
<u>Categories:</u>	A. The World in Spatial Terms
	B. Places and Regions
	C. Physical and Human Systems
	D. Environment and Society

Benchmarks are organized into three or four thematic categories within each strand: Geography, Civics, Economics, and History. These categories (e.g., Places and Regions, Historical Thinking Skills) provide further content definition by highlighting the underlying themes within the domain of each strand.

Benchmarks are coded by strand, standard, category, and grade cluster (E, M, H). The first term in the code always refers to the strand. The second term gives the standard number and category. The third term indicates the grade cluster and benchmark number. The fourth part indicates the GLE number.

Table 4.2 provides two examples of benchmark codes.
