

**Developing Skills Checklist (DSC)
CHILD'S PROFILE**

Child's Name _____

Initial Testing Date _____

Recently your child was given the Developing Skills Checklist (DSC), an individually administered assessment that measures prereading and mathematics skills. The scores on DSC, when combined with other performance indicators such as teacher observation, will help the teacher to determine the most appropriate instructional program for your child.

For each area, the Child's Profile indicates a performance level in terms of a percent correct score. The performance levels are based on the number of items your child answered correctly out of the total number of items in a particular area.

This report should give you information that is useful and meaningful. Please use the activities found in the "Preparing Your Child for Kindergarten" brochure to help your child grow in areas needing assistance.

Skill	Number of correct responses/total number of items	Percent Correct Score (number of correct responses/total item) x 100
Mathematical Concepts and Operations	_____/37	
Language	_____/29	
Memory	_____/29	
Motor	_____/6	
Visual	_____/16	
Auditory	_____/21	
Print Concepts	_____/21
